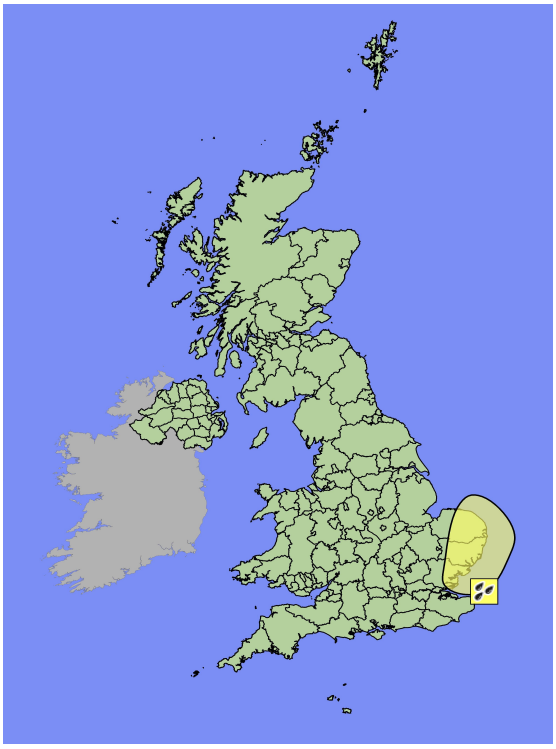
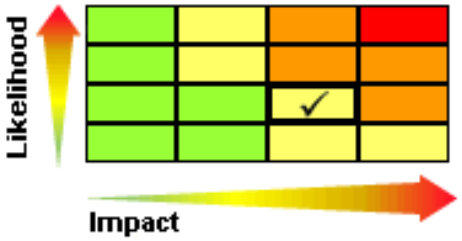
National Severe Weather Warning Service





Chief Forecasters Assessment
An occluded front coming up from the south on Friday will become slow moving through the period into Saturday. More than 30 mm are likely in some parts with the potential for 60-70 mm, which could cause some severe disruption. However, it is not clear whether the highest rates will be over land areas or in the southern North Sea, and this warning may be updated as the event approaches.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Sat, 09th Mar 2013** until **21:00 on Sat, 09th Mar 2013**

Persistent rain starting on Friday will turn heavy at times on Saturday with the potential for some very large totals. The public are advised to be aware of the risk of surface water flooding.
